INTRODUCTION

Ambitious MSc. Computer Science and Engineering student passionate about integrating IT and business.

Experienced in tailored IT solutions, consulting, and digital transformation. Skilled in coding, tech architecture, and cross-cultural collaboration, with global experience from studying in Singapore. Knowledgeable in cloud technologies, AI, data analysis, and enterprise systems. Eager to contribute to innovative projects that enhance business value and technology transformation.

IT SKILLS

Programming Languages: Java, F#, C, Python, Dart

Web-development: HTML, CSS, Javascript, React, RESTful API, Flutter

Security: Data Security, Network Security

Database management: SQL, MongoDB

Agile development methodologies: Kanban

Tools and applications: Git, Microsoft Office, Latex, Figma, Adobe Photoshop, HxGN EAM

PROJECTS

MyDTU – Development of a mobile application

Bachelor Project

- Led the development of MyDTU, a mobile application designed for over 10,000 students, enabling streamlined access to course content, assignments, and quizzes.
- Collaborated with a team of 3 developers, utilizing Flutter, Java, and REST APIs to build a scalable, responsive interface.
- Enhanced app functionality based on user feedback from over 100 students, improving user engagement.

HxGN EAM Implementation at AaF

Reliasset

- Customized HxGN EAM for Aalborg Forsyning (AaF), aligning system implementation with business requirements, resulting in a 20% improvement in asset tracking efficiency.
- Created training materials for a workshop on mobile system usage, supporting end-users in navigating the platform effectively.

WORK EXPERIENCE

Junior Consultant at Reliasset

Kgs. Lyngby, Denmark // December 2020 – now

- Configured HxGN EAM systems for 2 major clients, ensuring customized solutions that optimized asset management processes and improved operational efficiency.
- Provided technical support and troubleshooting for various clients.
- Leading a project to extract and analyze 10 years of financial data for Danish companies using Power BI, creating a comprehensive database.

EDUCATION

Copenhagen Business School (CBS)

Frederiksberg // September 2024 – January 2025

- Focus: Electives in Customer Experience, Business Model Innovation, Digital Transformation, and IT Management.

Technical University of Denmark (DTU)

Kgs. Lyngby // September 2019 – June 2025

- Bachelor of Science (BSc. -Eng): Software Technology
- Master of Science (MSc. -Eng): Computer Science and Engineering
- Developed a comprehensive understanding of key areas within the IT industry and gained hands-on experience through various large-scale projects.

Nanyang Technological University (NTU)

Singapore // January 2022 – June 2022

- Exchange student at NTU's Faculty of Computer Science, enhancing cross-cultural collaboration skills and global perspective.

VOLUNTARY WORK

Dayguide – Student for a day programme

DTU, Kgs. Lyngby, Denmark // September 2019 – now

As a volunteer dayguide at DTU, I led campus tours, completed group work and attended lectures with prospective students to introduce them to the Software Technology degree.

Student Internship Assistant

DTU Compute, Kgs. Lyngby, Denmark // October 2021 – 2022

Helped high school students understand the academic and social aspects of being a student at DTU through presentations, tours, and advice.
